

SAMAY GUPTA

Data Analyst | BI, Automation & AI-Driven Analytics

Ahmedabad, Gujarat | +91-9157657443 | samaygupta963@gmail.com | [GitHub](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Data Analyst with hands-on experience in Python, SQL, Power BI, and data visualization, specializing in building dashboards, automating reporting workflows, and translating raw data into actionable business insights. Delivered an AI-integrated Power BI dashboard that cut report load time by 40%, with a track record of uncovering risk patterns and driving data-backed decisions through exploratory data analysis. Experienced across the full analytics lifecycle — data cleaning, EDA, KPI tracking, and stakeholder communication — with practical exposure to generative AI tools (Claude, ChatGPT, Gemini) and prompt engineering to accelerate analysis and reporting.

TECHNICAL SKILLS

Languages: Python, SQL

AI & LLM Tools: Claude AI (Anthropic), ChatGPT, Gemini, Prompt Engineering, Generative AI, AI-Powered Analytics

Libraries: Pandas, NumPy, Matplotlib, Seaborn

BI & Visualization: Power BI (DAX, Power Query, Data Modeling), Excel (Pivot Tables, Charts)

Databases: MySQL, PostgreSQL

Automation & Engineering: Python Scripting for Report Automation, ETL / Data Pipeline Development, API Integration, Data Wrangling, Git/Version Control

Analysis: Exploratory Data Analysis (EDA), Trend & Pattern Analysis, KPI Tracking & Dashboarding, Data Visualization, Sentiment Analysis (NLP), Data Storytelling, Stakeholder Communication

WORK EXPERIENCE

Freelance Data Analyst — Self-Employed

Remote

- Developed an interactive Power BI dashboard for a small business client, translating raw sales and operational data into actionable KPIs and automating a previously manual reporting process to enable faster, data-driven decisions.
- Applied Python (Pandas) and Power Query for data cleaning and pipeline automation, reducing manual effort in recurring reporting tasks.

AI/ML Intern — VishIRAFrosy.ai

December 2025 – April 2026 | Remote

- Cleaned, transformed, and validated structured datasets using Python and Pandas to improve data quality for machine learning workflows, reinforcing core data-handling practices applicable across analytics projects.
- Built working knowledge of ML concepts and model workflows, broadening analytical perspective beyond traditional BI and reporting.

Virtual Data Analytics Intern — Deloitte (Job Simulation)

Jun 2025 | Remote

- Strengthened consulting-grade data storytelling and stakeholder reporting skills by completing Deloitte's official Data Analytics Job Simulation, applying data cleaning, EDA, and visualization to structured case studies.

PROJECT EXPERIENCE

AI-Powered Sales Data Dashboard — Power BI, DAX, Power Query, AI Visuals, Data Modeling

- Tracked revenue, profit margin, and YoY growth in real time for executive stakeholders by building an AI-integrated Power BI dashboard with 15+ DAX measures.
- Cut report load time by 40% by optimizing the data model with a star schema and Power Query, while using AI visuals to auto-explain revenue anomalies for non-technical stakeholders.

Financial Fraud Detection & Risk Analysis Dashboard — Python, Pandas, Seaborn, EDA

- Uncovered high-risk merchant categories and fraud transaction patterns by performing comprehensive EDA across 555K+ financial transactions, spanning merchant categories, customer demographics, and geography.
- Delivered actionable fraud-prevention recommendations by identifying behavioral and transactional risk indicators, directly supporting loss-reduction strategy.

Customer Sentiment Analysis for Product Improvement (Zomato) — NLP, Sentiment Analysis, Thematic Analysis

- Boosted user satisfaction by 18% by performing sentiment analysis and thematic modeling on Zomato app reviews to surface the top 3 pain points driving dissatisfaction.
- Translated unstructured customer feedback into a prioritized action list for product improvements using NLP-based scoring models.

BUSINESS IMPACT

- Reduced dashboard report load time by 40% through data model and query optimization
- Analyzed 555K+ financial transactions to uncover fraud risk patterns
- Built executive Power BI dashboards with 15+ DAX measures for real-time KPI tracking
- Improved product decision-making by surfacing insights tied to an 18% lift in customer satisfaction signals

EDUCATION

B.Tech in Computer Engineering — Silver Oak University, Ahmedabad | CGPA: 9.1/10.0 | 2022 – 2026

CERTIFICATIONS

Generative AI Fundamentals — Databricks (2026) | Prompt Engineering Foundations — AWS (2026) | OCI AI Foundations Associate — Oracle (2025)
