SAMAY GUPTA

Data Analyst

Ahmedabad, Gujarat | +91-9157657443 | samaygupta963@gmail.com | github.com/samaygupta | linkedin.com/in/samaygupta

PROFESSIONAL SUMMARY

Results-driven Data Analyst with hands-on experience in Python, SQL, Power BI, and Generative AI. Proven ability to deliver end-to-end data solutions — from raw data cleaning and exploratory data analysis (EDA) to production-ready AI-powered business intelligence dashboards — across sales analytics, e-commerce logistics, and sports intelligence domains. Skilled at building data pipelines, defining KPIs, and translating complex datasets into actionable business narratives for both technical and non-technical stakeholders. Experienced with Claude AI and large language model (LLM) tools for automated insight generation and report summarization. Seeking a full-time Data Analyst role to drive strategic business growth through data-driven decision-making.

TECHNICAL SKILLS

Languages: Python, SQL
AI and LLM Tools: Claude AI (Anthropic), Prompt Engineering, Generative AI, AI-Powered Analytics
Libraries: Pandas, NumPy, Matplotlib, Seaborn
BI and Visualization Tools: Power BI (DAX, Power Query, Data Modeling), Excel (Pivot Tables, Charts)
Databases: MySQL, PostgreSQL
Core Competencies: Data Cleaning, EDA, KPI Tracking, Dashboard Development, Data Storytelling, Business Intelligence, Stakeholder Reporting, Data Pipeline Automation

WORK EXPERIENCE

Freelance Data Analyst | Self Employed **July 2025 – Present**
Ahmedabad, Gujarat | Remote

- Delivered end-to-end data analysis and Power BI business intelligence dashboard solutions for small businesses, translating raw sales and operational data into actionable insights and measurable KPIs.
- Automated manual reporting workflows using Python (Pandas, Matplotlib) and Power Query, saving clients 5–8 hours of manual work per week and reducing human error in recurring reports.
- Designed and deployed AI-assisted analytics workflows using Claude AI and Generative AI tools to accelerate insight generation, report summarization, and stakeholder communication.
- Built and maintained data pipelines for cleaning, transformation, and EDA across 2+ client projects in retail and e-commerce, improving decision turnaround time significantly.

Virtual Data Analytics Intern | Deloitte *(Job Simulation)* **Jun 2025**
Remote

- Completed Deloitte's official Data Analytics Job Simulation, analyzing real-world business datasets to derive actionable insights aligned with consulting-grade workflows.
- Applied data cleaning, exploratory data analysis (EDA), and visualization techniques to solve structured case-study problems reflecting industry scenarios.
- Strengthened stakeholder reporting and data storytelling skills by communicating findings clearly to both technical and non-technical audiences.

PROJECTS

Apple iPhone Sales Analysis | Tools: Python, Pandas, Matplotlib, Seaborn, EDA

- Analyzed 5+ years of iPhone sales data to uncover seasonal trends, regional performance, and pricing impact on revenue, delivering an actionable business intelligence report for marketing strategy.
- Built a multi-stage data cleaning pipeline with Pandas, eliminating 30%+ data inconsistencies and producing analysis-ready datasets for downstream visualization.
- Created 10+ visualizations revealing that premium models drive 65%+ of total revenue — insight directly adopted for product marketing and pricing strategy recommendations.

AI-Powered Sales Data Dashboard | Tools: Power BI, DAX, Power Query, AI Visuals, Data Modeling

- Built an AI-integrated Power BI dashboard with 15+ DAX measures tracking revenue, profit margin, and year-over-year (YoY) growth in real time for executive stakeholder reporting.
- Optimized data model using star schema and Power Query, reducing report load time by 40% through query folding and data pipeline best practices.
- Leveraged Power BI AI visuals (decomposition tree, key influencer) to auto-explain revenue anomalies, enabling non-technical stakeholders to independently explore KPI drivers.

IPL Analysis Dashboard (2008–2025) | Tools: Power BI, DAX, Power Query, Data Modeling

- Designed a sports analytics platform covering 17 seasons, 200+ players, and 800+ matches with automated post-match data refresh and dynamic season-level filtering.
- Built advanced DAX measures for win-rate analysis, player scoring trends, and head-to-head team comparisons — demonstrating expertise in complex data modeling and KPI design.
- Delivered drillable stakeholder reports supporting cricket strategy insights; recognized at university project showcase as a production-ready business intelligence solution.

EDUCATION

B.Tech in Computer Engineering **2022 – 2026**

Silver Oak University, Ahmedabad | CGPA: 9.1 / 10.0

CERTIFICATIONS

- **AI Dashboards using Microsoft Power BI** – Skill Nation (Jul 2025)
- **Generative AI for Beginners** – Great Learning (Nov 2024)
- **Python Programming** – Great Learning (Jan 2024)
